Diversity is celebrated and encouraged. Preference will be given to Nationals and people from the communities around the operations.

All new employees will be selected based on culture and values fit.

About the Role

Reporting to Mine Operations Superintendent.

The Shift Engineer will be responsible for the operation during a shift in the underground mine, coordinating and supervising mining contractor and owner mining teams to meet all statutory and company standards including safety, schedules and cost.

Job description

- Coordinate and supervise mining activities and contractors during a shift in the underground mine
- Attends the report at the beginning and end of the shift.
- Person is obliged and responsible, within the scope of his work, for the application of measures for safe and healthy work in accordance with the Law on Safety and Health at Work, other regulations in that area, and the Rulebook on Safety and Health at Work.
- Participates in ensuring the functioning of the quality system in accordance with quality standards.
- Supervises and coordinates the work of contractor staff.
- Supervise and coordinate mining owner activities.
- Indicates potential omissions in the performance of mining operations and provides direct guidance to supervisory staff for corrections.
- Coordinates with the geological, geotechnical, and planning representatives during the shift.
- Maintains best practice procedures for contractor activities.
- Implements and promotes various initiatives following the principles of inspection, planning, decision, execution, and monitoring.
- Capture, validate and record mine operations data.

- Adheres to the ethical principles of the profession and acts in accordance with the policies and procedures of the Employer.
- Develops knowledge and adopts techniques to optimize production, ventilation, and drainage.
- Perform other duties as assigned

About You

The successful candidate will ideally possess the following

Experience

- At least 3 years in a similar position with a preference in UG hard rock mining or tunnelling

Education and knowledge

- Bachelor's degree in Mine engineer
- Passed the technical exam
- Demonstrates strong conceptual skills and can develop lateral and practical solutions
- Strong analytical and problem-solving skills
- Ability to respond to a changing work environment
- Working under pressure and ability to manage multiple projects and tasks at the same time
- Software knowledge: AutoCAD, MS Office
- Driving license B category

About Our Process

At Eastern Mining, we are committed to employing individuals who align with the company values and meet the requirements of the role. As part of the recruitment process, there are a number of checks which may be conducted to demonstrate an applicant's suitability for a role including police/criminal background checks, medical, due diligence checks, right to work checks, occupational assessment, and/or reference checks.
