About Eastern Mining

We value a diverse and motivated workforce that thrives on seeking responsibility for excellence. Eastern Mining is committed to building a working environment that is secure, fair, and diverse and a culture that fosters leadership and allows every person to contribute and to realize their potential. Sound employment practices are crucial to the development of a workforce with the necessary skills and qualities to support a successful, ethical, and responsible business. Diversity is celebrated and encouraged. Preference will be given to Nationals and people from the communities around the operations.

All new employees will be selected based on culture and values fit.

About the Role

Reporting to Chief Mine Engineer.

The Mine Planning and Design Engineer will contribute to and deliver planning and designing of mine development, mine production, backfilling, services, and national mine designs.

Job description

- Prepare and issue mine plans (short and medium-term) and schedules relating to the production and supporting auxiliaries, dump leach and the concentrate feed.
- Establish schedules that highlight budgeted metal production targets with appropriate activities to achieve.
- Maintain and monitor all mine planning including survey data, pit design, productivity trends.
- Contribute to projects in a technical capacity working within a cross discipline team exploring options to realise value on a systemic level for mine operations, e.g., conduct site and desktop trials, analyse complex data sets and report on conclusions and recommendations, evaluate results, document methodologies and learnings, etc.
- Work with Hydrology, Geotech and Geology personnel to ensure safe and optimal mine designs.
- Ensure use of planning data to drive continuous improvement projects.
- Conduct field surveys and assessments.
- Assist in developing forecasts, physical and operating budget estimates.
- Coordinate and deliver results in written reports or presentation form.
- Perform administrative duties as required.
- Design and signature in house mining project according to the Mining Law.

About You

The successful candidate will ideally possess the following

Experience

- Experience of 5 years in the same or similar jobs, minimum 3 years of work experience in underground exploitation.
- Fulfil the minimum requirements by mining law to designing and signing underground mining

Education and knowledge

- Bachelor's degree in Mining
- Passed the professional exam
- Active knowledge of English Language
- Advanced computer knowledge
- Driving license B category
- Being comfortable working at a detailed and strategic level and supporting this with the necessary written, numerical, and verbal skills

About Our Process

At Eastern Mining, we are committed to employing individuals who align with the company values and meet the requirements of the role. As part of the recruitment process, there are a number of checks which may be conducted to demonstrate an applicant's suitability for a role including police/criminal background checks, medical, due diligence checks, right to work checks, occupational assessment, and/or reference checks.

How to apply:

To apply for the opportunity, kindly send a copy of your CV clearly indicating the reference number to posao@manpowergroup.ba before the end date.

No applications will be considered after submission of the end date and time or if the information that is sent is incomplete. [30st April 2022, 17:00 o'clock].
