1. INTRODUCTION

Adriatic Metals PLC commissioned Wardell Armstrong International (“WAI”) to develop a framework Stakeholder Engagement Plan (“SEP”) for the Veovaca processing plant and Rupice mine, collectively the “Vares Project”, located in northern central part of the Federation of Bosnia and Herzegovina (“BiH”). The SEP was originally issued alongside the WAI Environmental and Social Scoping Study, January 2020, and was intended to be read in conjunction with this and the Scoping Report, November 2019. The Scoping Study has been updated subsequently to incorporate the detail from the September 2021 Feasibility Study and the European Bank for Reconstruction and Development’s (“EBRD”) comments and to advance it from framework to operational.

Version 8.0 of the SEP (this version) will be ‘owned’ by Adriatic Metals BH d.o.o. (“Adriatic Metals”) and subsequent updates will be made by them and approved by Dominic Roberts, Head of Corporate Affairs.

1.1 Report Overview

This document considers the most recent project design (Feasibility Study dated September 2021) and is developed with the aim of guiding stakeholder consultations and communications throughout the life of the Project, including closure. The SEP will be monitored, reviewed, and updated on a regular basis by Adriatic Metals providing a roadmap for engagement and monitoring the effectiveness of impact mitigation measures.

This plan has been developed to meet best practice as exemplified by the standards of the Equator Principles financial institutions, including the sustainability frameworks of the International Finance Corporation (“IFC”) and EBRD’s Performance Requirements 1 & 10.

During the construction and operational phases, stakeholder engagement activities are focused on keeping stakeholders informed about the project activities and to engage them in terms of monitoring and impact management.

Stakeholders are invited to review and provide feedback on this SEP. Adriatic Metals will ensure this document is available and accessible to stakeholders in Bosnian, Croatian, Serbian, and English. All comments and questions are welcome and should be sent to the Senior Management Team, which includes:

- Paul Cronin, Chief Executive Officer;
- Graham Hill, Technical Director;
- Alem Logo, Executive Director;
- Dominic Roberts, Head of Corporate Affairs;
- Vildana Mahmutovic, Head of Sustainability; and
- Aida Ahmedovic, Social Responsibility Manager.

The Head of Sustainability, Vildana Mahmutovic, was engaged in February 2020 and is now leading Stakeholder Engagement activities, alongside Alem Logo and the wider sustainability team namely, Aida Ahmedovic, Social Responsibility Manager and Almedina Likic, Social Responsibility Coordinator.

In September 2019 the Adriatic Metals Information Centre was opened on the main street in Vares. The centre is open from 08:00 – 16:30 Monday to Friday. It is shut on weekends and Public Holidays. The Information Centre has one member of staff who is available to community members during office hours. A register of stakeholders visiting the Information Centre is maintained. The purpose of the office is to increase the presence of Adriatic Metals in Vares, providing a service for community members and allowing Adriatic Metals to communicate more effectively with local stakeholders. Currently, the office is focused on informing local communities about project activities, future engagement and a large recruitment campaign conducted by the Human Resources Department. Information is constantly shared locally and on social networks, so that access to information is maintained as much as possible.

1.2 Project Description

Metalliferous ore has long been mined in the Vares Municipality of the Zenica-Doboj Canton, BiH. However, a new discovery in the west of the municipality of a deposit with high grades of zinc, lead, barite, and other metals has been made in recent years. Adriatic Metals plans to extract these metals, contributing to the global supply of these essential materials. The construction of an underground mine in Rupice is underway. The Rupice and Veovaca sites are located approximately 8.7km west-north-west and 3.5km east, respectively, from the town of Vares (Figure 1.). One of the highest-grade poly-metallic deposits located anywhere in the world, the quality of the Rupice ore body is such that the Company will start commercial production in October 2023, and be in full production by the spring of 2024. The size and scale of the project is such that it makes a manifest difference to whole country's gross domestic product (estimated at an increase of nearly 2% by the EBRD) and enormous impact on the economy of Vares and the wider Canton.

The Vares Project is fully permitted, including environmentally according to BiH legislation. Additionally, the Company has committed to running the Vares Project in line with internationally recognized industry environmental standards, such as those developed by the World Bank and the EBRD. Further to the issuance of a state Environmental Impact Assessment in 2019 the Company completed the first internationally compliant (to EBRD's standards) Environmental Social Impact Assessment and a separate Health Impact Assessment. By determining both the baseline environmental, social and health conditions the Company can, and will, ensure that its operations at minimum do no harm but at best improve the quality of the air, water, soil, and health of Vares. Throughout operations, and indeed after them, the Company is continuously monitoring all aspects of its potential impact on its host community and environment.

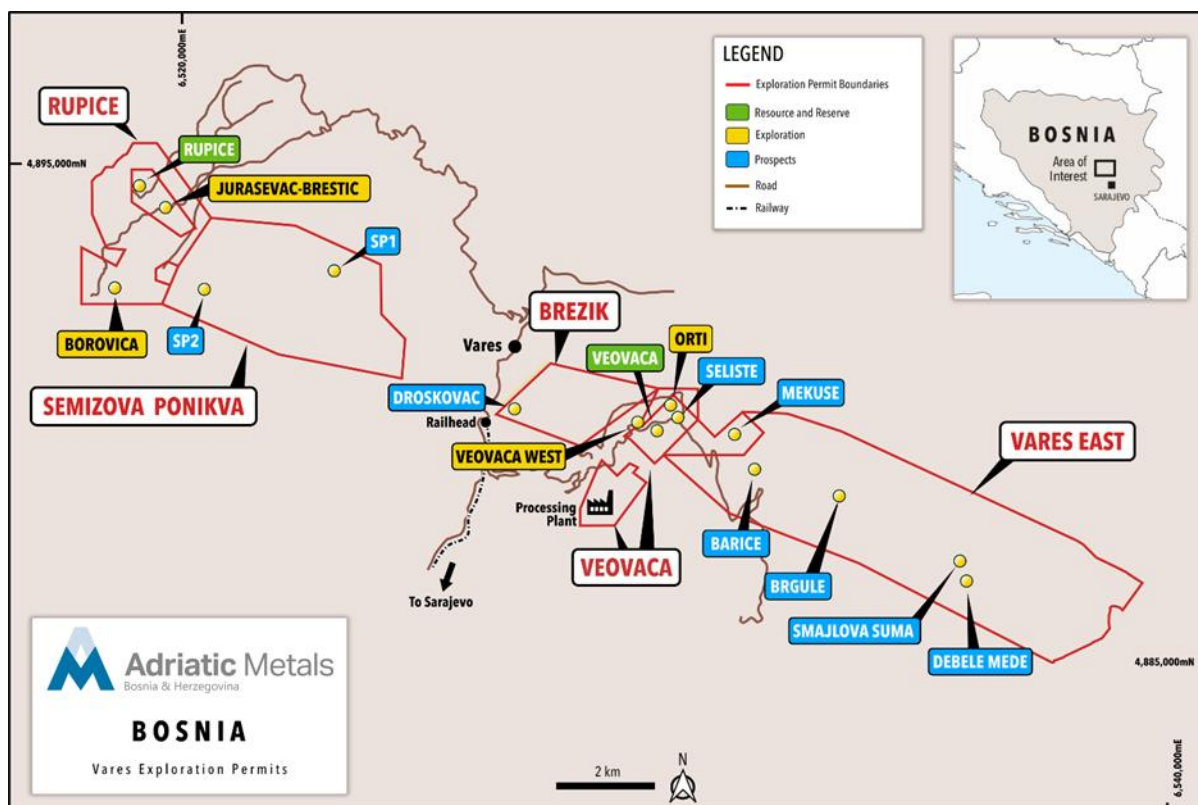

Figure 1. Map showing the location of Vares Project

1.3 Construction Phase

Adriatic Metals has entered the construction phase with the Vares Project, which currently consists of three parts: the Rupice underground mine, the processing plant and the haul road connecting the two locations.

Rupice Underground Mine

In November 2021, contractors began work on the preparation of the construction of the infrastructure at the Rupice site.

Vevaca Processing Plant (VPP)

Work is currently being carried to complete the five buildings required to house the processing plant. It is planned that these works will be completed by the end of April 2023. After this the installation and assembly of the process equipment (mills, flotation cells, pumps, cyclones, reagent systems, pipelines, valves, compressors, belt conveyors and feeders, thickeners, tanks, analysers, filter presses & ventilation systems) are planned to be completed by August 2023 ahead of commissioning of the plant in September.

Haul Road

The haul road is being built by the Municipality of Vares with the financing and technical assistance of the Adriatic Metals. The transport route of the road is divided into five parts/lots of approximately 5 km in length. The construction of the first section of the haul road started in September 2022, LOT1

from Rupice to Igriste, which represents the first 5km of the road from the Rupice mine to the Veovaca processing plant, and in January 2023 started LOT2 and LOT5, where LOT5 represents the last 5km of the haul route. Permits are being obtained for LOT2 (Igriste - Mrestiliste), LOT3 (Mrestiliste - Semizova Ponikva) and LOT4 (Semizova Ponikva via Smreka to Viaduct). Completion of works on the haul road is expected by September 2023.

Special attention is paid to informing the population about the construction works, through meetings and site visits to households, and informing the members of the Public Liaison Committee ("PLC"). At the ninth session of the PLC, held on 28.4.2022, the activities of the construction phase at the Rupice site were presented. In the House of Culture at Przici, 23.3.2023, a presentation of the haul road was held, with an emphasis on the LOT5 section, for the residents of the local communities of Przici, Dastansko and Mir.

2 RELEVANT LEGISLATION, POLICY AND GUIDELINES

2.1. Bosnia and Herzegovina Legislation

In BiH, legislation relevant to the Environmental Impact Assessment Process, which includes commitments to stakeholder engagement, includes the following:

- Law on Environmental Protection ("Official Gazette of the FBiH," No.15/21);
- Law on Nature Protection ("Official Gazette of the FBiH," No. 66/13);
- Law on Water ("Official Gazette of the FBiH," No. 70/06);
- Law on Water ("Official Gazette of the Zenica - Doboje Canton", No. 17/07);
- Law on Waste Management ("Official Gazette of the FBiH," No. 33/03, 72/09 and 92/17);
- Law on Air Protection (Official Gazette of FB&H No. 33/03 and 04/10);
- Law on Protection against Noise (FB&H Official Gazette No. 110/12);
- Law on Protection against Noise (Official Gazette of the Zenica - Doboje Canton", No. 01/14);
- Law on Spatial Planning and Land Utilization at the FBiH level ("Official Gazette of the FBiH," No. 02/06, 72/07, 32/08, 04/10, 13/10, 45/10);
- Regulation on Determination of Works and Buildings for Which the Federal Ministry of Spatial Planning Issues the Urban Permit and/or Location Information ("Official Gazette of the FBiH," No. 32/14);
- Regulation on Plants and Facilities for Which the Environmental Impact Assessment Must Be Carried Out and Plants; and Facilities Which Can Be Constructed Only with the Environmental Permit ("Official Gazette of the FBiH," No. 19/04);
- Regulation on Content, Order of Preparation, Constituent Parts and Method of Developing Mining Projects ("Official Gazette of the FBiH," No. 53/12);
- Decision on Conversion of Forest Land to Construction Land ("Official Gazette of the FBiH," No. 108/12); and
- Law on Forests ("Official Gazette of ZDC," No. 8/13 and 1/15).

2.2. International Standards

Regarding Stakeholder Engagement, both the IFC Performance Standards on Environmental and Social Sustainability 2012 and the EBRD Environmental and Social Policy (2019) are applicable to the Vares Project. These standards are regarded as the benchmark for internationally accepted best practice in a range of areas, including stakeholder engagement, and have therefore been used to frame this plan.

IFC and EBRD requirements for Project information disclosure exceed the requirements of the European Union, as defined by the UNECE Aarhus Convention, as well as those of the BiH laws and regulations

2.2.1 EBRD Performance Requirements

EBRD Performance Requirement 10 on Information Disclosure and Stakeholder Engagement standards stresses that public consultation should be started early in a project's development and that engagement with interested parties at every stage should be: "*free of manipulation, interference, coercion, and intimidation, and conducted on the basis of timely, relevant, understandable and accessible information, in a culturally appropriate format*".

Specific requirements set forth in EBRD Performance Requirement 10 include:

Engagement During Project Preparation

- Stakeholder Identification and analysis including stakeholder mapping to identify those either directly or indirectly affected by the Project, or those interested in the Project.
- Stakeholder Engagement Plan – to be initially prepared during the scoping phase and then developed as a live document throughout the project life. The SEP details how communication with identified stakeholders will be conducted through project preparation and implementation.
- Information disclosure regarding project planning and development, potential environmental and social risks and impacts arising from the Project, the consultation process and any envisaged public hearings. For a category A project, which the Vares Project is classified, the Environmental and Social Action Plan („ESAP“) will be disclosed.
- Meaningful consultation, meaning identified stakeholders will have opportunity to express their views on project risks, impact and mitigation measures. The operator will then be able to consider and respond in a constructive way.
- Informed and iterative consultation, allowing stakeholders to input to the decision-making process during the project preparation phase.

Engagement during Project Implementation

- Throughout the duration of the project there should be ongoing provision of information to identified stakeholders. Part of this engagement should include a two-way dialogue to receive feedback on the effectiveness of mitigation measures and items within the ESAP.

- Reporting on the implementation of the ESAP should be provided to stakeholders as well as any issues that pose risk to stakeholders or that have arisen as a result of consultation or the grievance mechanism. All feedback should be accessible to identified stakeholders.
- Regular external reporting is encouraged on the environmental and social performance of the Project.

Grievance Mechanism

- A grievance mechanism, process, or procedure to receive and facilitate resolution of stakeholders' concerns and grievances about the Project's environmental and social performance should be developed and implemented.
- This procedure should address concerns promptly and effectively, using an understandable and transparent process that is culturally appropriate and readily accessible to all segments of the affected communities, at no cost and without retribution.
- A separate grievance mechanism for employees and workers is also in place.

2.2.2 IFC Performance Standards

Specific requirements set forth in the IFC Performance Standard 1 include:

Stakeholder Analysis and Engagement Planning

- Identify affected communities and other stakeholders that may be interested in the Project and consider how external communications might facilitate a dialogue with all stakeholders; and
- Development of the SEP, including measures to allow for the effective participation of stakeholders, particularly those identified as disadvantaged or vulnerable.

Disclosure of Information

- Provision of relevant information on (i) the purpose, nature and scale of the project; (ii) duration of the proposed activities; (iii) any risks to and potential impacts on such communities and the relevant mitigation measures; (iv) the envisaged stakeholder engagement process; and (v) the grievance mechanism.

Consultation

- Undertake a process of consultation that provides affected communities with opportunities to express their views on Project risks, impacts and mitigation measures; and
- Includes a two-way process that (i) begins early in the process of identification of environmental and social impacts and continues on an on-going basis as impacts arise; (ii) is based on prior disclosure and dissemination of relevant, transparent, objective, meaningful and easily accessible information that is in a culturally appropriate local language; (iii) focuses inclusive engagement on those directly affected as opposed to those not directly affected; (iv) is free of external manipulation, interference, coercion, or intimidation; (v)

enables meaningful participation where applicable; and (vi) is documented; and is tailored to the language preferences of the affected communities, their decision-making process and the needs of disadvantaged or vulnerable groups.

Informed Consultation and Participation

- Conduct an informed consultation and participation process that will result in affected communities' informed participation;
- Manages a consultation process that (i) captures both men's and women's views, if necessary, through separate forums or engagements, and (ii) reflect men's and women's different concerns and priorities about impacts, mitigation mechanisms, and benefits, where appropriate; and
- Documents the process, in particular the measures taken to avoid or minimise risks to and adverse impacts on the affected communities and will inform those affected about how their concerns have been considered.

External Communications

- Implementation of a procedure for external communications that includes methods to (i) receive and register external communications from the public; (ii) screen and assess the issues raised and determine how to address them; (iii) provide, track and document responses; and (iv) adjust the environmental and social management programme.

Grievance Mechanism for Affected Communities

- Establish a grievance mechanism to receive and facilitate resolution of affected communities' concerns and grievances about the environmental and social performance; and
- Inform the Affected Communities about the mechanism during the stakeholder engagement process.

Ongoing Reporting to Affected Communities

- Provision of a schedule for periodic reports to the affected communities that describe the progress with implementation of the project action plans on issues that involved on-going impacts on affected communities and on issues that the consultation process of grievance mechanism have identified as a concern to those communities; and
- Provision of reports not less than annually.

3 PROJECT AFFECTED STAKEHOLDERS

The Head of Sustainability, Vildana Mahmutovic, was engaged in February 2020 and leads Stakeholder Engagement activities, Adriatic Metals's Executive Director, Alem Logo, maintains relations with government at the national, canton and municipality levels.

3.1 Stakeholder Identification

Stakeholder identification is a crucial step in managing the overall stakeholder engagement process. Accurate stakeholder identification reduces the risk of a narrow stakeholder group dominating the consultation process and helps a company to identify and address legitimate concerns related to project impacts.

To develop an effective SEP, it is necessary to determine who the stakeholders are and understand their needs and expectations for engagement, and their priorities and objectives in relation to the Project.

For the Project, stakeholders are identified by:

- Identifying the different categories of parties who may be affected by or interested in the project; and
- Identifying specific individuals or organizations within each of these categories, considering:
 - Expected geographic area of influence of the Project;
 - Nature of impacts that could arise and therefore the types of government bodies, non-governmental organizations, academic institutions and other bodies who may have an interest in these areas; and
 - Recognition that the process of identifying the individual and organizations within each group is a continuing one, including contacts the Project has already made and those it may make as a result of changes to the Project design or ongoing consultations.

At Vares mapping has been ongoing since 2019 and stakeholders have been identified within the following categories:

- Government authorities at the federal, canton and municipal levels;
- Project-affected communities, including individual residents as well as non-organized groups with particular areas of interest or that may be at risk (elderly, gender, people with disabilities, ethnic minorities, etc.), including community leaders and representatives;
- Multi-national and international organizations (UN agencies, World Bank, multi-lateral and bi-lateral development agencies, etc.);
- Non-governmental organizations at the international, national, regional and local levels, including organised community-based organisations or interest groups (labour, youth, education, religious, business, etc);
- Commercial organisations and business associations;
- Project employees; and
- Media.

The following sections introduce each of these categories, a stakeholder mapping document is attached as Appendix 1 to this SEP. Stakeholder mapping is a continuing process and if new stakeholders are identified, they are incorporated into the appropriate engagement processes.

3.2 Government Authorities

3.2.1 National – Federation of Bosnia and Herzegovina

The Vares Project is in the Vares Municipality, with the Rupice deposit close to the border of the neighbouring Kakanj Municipality, both in the Zenica-Doboj Canton in the Federation of Bosnia and Herzegovina, one of two entities of Bosnia and Herzegovina, the other being the Republika Srpska. The two are politically autonomous, however, the district of Brcko is jointly administered by both. Each federal entity has its own constitution.

National authorities are defined as those agencies of the Government of the Federation of BiH who have the power to regulate or otherwise influence the Project in terms of establishing policy, granting permits or other approvals for the Project, and monitoring and enforcing compliance with BiH law throughout all stages of the Project life cycle (planning, construction, operation and closure)

The Federal Ministry of Environmental and Tourism has the following functions¹:

- a) plans, proposes and implements strategic documents, policies, financial plans and programs in the field of environmental protection, as well as programs and regulations in the field of prevention, remediation and development of environmental protection;
- b) monitors, analyses and evaluates the state of the environment and the implementation of environmental protection, as well as experiences gained in the field of protection, use and development of the environment;
- c) establishes and manages the system of reporting and information on the environment in the Federation of BiH;
- d) issues environmental permits within its competence in accordance with the provisions of this Law and other regulations;
- e) keeps a register on pollutants and pollution of all components of the environment which is available to the public;
- f) organizes activities aimed at preventing or reducing harmful consequences for the environment;
- g) participates with other competent bodies in the development of programs and plans for the use of natural resources, development and implementation of a special plan and qualification system and decides on appeals against decisions of cantonal ministries made under federal law and other

¹ <https://www.paragraf.ba/propisi/fbih/zakon-o-zastiti-okolisa.html>

federal regulations and performs other environmental tasks and tasks within the competence of the Federation of BiH; and

- h) provides the necessary assistance to the competent state bodies in the implementation of international obligations undertaken by BiH and cooperate with the competent ministry of the Republika Srpska, the competent authority of the Brcko District of BiH and the institutions of BiH.

From the very beginning, the company has maintained harmonious relations with state/federal authorities, as indicated by the visit of the Prime Minister of the Federation of Bosnia and Herzegovina and the Minister of Energy, Mining and Industry of the Federation of Bosnia and Herzegovina. In addition, the company was visited by the Minister of Environment and Tourism of the FBiH, as well as the President of the Federation of BiH, the Minister of Spatial Planning, the Deputy Minister of Foreign Trade and Economic Relations of BiH and the Mayor of the Municipality of Vares. As before, Adriatic Metals will strive to make cooperation with the authorities at all levels sustainable and successful.

3.2.2 Regional – Zenica - Dobož Canton

The Project is located in the Zenica-Dobož Canton in the northern central part of the country. Each canton has its own administrative government and relative autonomy on local issues. Cantons are further subdivided into municipalities.

The Canton is responsible for²:

- a) preparing draft regulations and planning documents in the field of environmental protection, which are harmonized with federal regulations, strategies and other planning documents in this field;
- b) analysing and assessing the state of the environment and environmental protection activities by exchanging experiences gained in the field of environmental protection and use;
- c) performing other tasks and duties determined by federal law and other federal regulations;
- d) establishing and managing the environmental information system in the canton;
- e) issuing licenses within its competence;
- f) organising activities aimed at preventing or reducing harmful consequences for the environment;
- g) supervising the implementation of cantonal regulations and planning documents in the field of environmental protection;
- h) establishing and implementing a system of prohibition of movement of motor vehicles of certain eco categories when it is assessed that this is a necessary measure in environmental protection; and
- i) performing other tasks determined by the cantonal regulation.

A good standing relationship exists between Adriatic Metals and the Cantonal Government.

² <https://www.paragraf.ba/propisi/fbih/zakon-o-zastiti-okolisa.html>

3.2.3 Local – Vares Municipality

The project is located in the municipality of Vares, and it is managed by its Mayor Zdravko Marosevic, who was elected in the elections held on 15 November 2020 for a term of four years. Directly adjacent to the Rupice Project lies the border with Kakanj Municipality.

Local municipalities are responsible for³:

- Environmental protection policies (establishment and implementation);
- Management of natural resources of the local self-government units;
- Management, financing and improvement of the operations and utilities (water supply, wastewater disposal and treatment and solid waste collection and disposal); and
- Management, financing, and improvement of parks.

The local authorities have already been engaged in the Vares Project and a good relationship with them currently exists. The local authorities will be continuously engaged during project development by way of ongoing dialogue, so that they understand what is happening in their municipalities and are in a position to consider project activities in their policy-making, regulatory and other duties and activities.

A good standing relationship exists between Adriatic Metals and the Municipality of Vares. This good cooperation is a part of our policy of transparent relations with the local community and informing about our project activities.

3.2.4 Local – Kakanj Municipality

The municipality of Kakanj is located in the immediate vicinity to the west of Rupice Project. The connection with the Municipality of Kakanj was established through consultative meetings with the management of the Municipality of Kakanj, focusing on the dissemination of information. This engagement has now been formalized and is progressing successfully with the involvement of all stakeholders affected by the Project.

Co-operation was established with the Public Company VODOKOM d.o.o. Kakanj, which oversees water supply of the Kakanj Municipality. At the meeting held with the representatives of this company, the monitoring of water quality data was exchanged. On that occasion, the representative of the Public Company VODOKOM d.o.o. Kakanj was appointed as a member of the first convocation of Public Liaison Committee.

Given that the Adriatic Metals is actively working on a strategy of access and engagement in the area of Kakanj Municipality, that it plans to carry out its socially responsible work in the local communities of this municipality, some of the planned activities were successfully implemented, such as cooperation with local non-governmental organizations, meetings with local government representatives as well as initial meetings with presidents of local communities who are in the interest group.

³ <https://portal.cor.europa.eu/divisionpowers/Pages/Bosnia-Herzegovina-Environment.aspx>

3.2.5 Local – Breza Municipality

The Breza municipality borders the Vares municipality, and due to the infrastructure and regional transport routes towards Vares, it is inevitable to pass through this municipality. In the previous period, cooperation, and acquaintance with the municipal authorities from Breza as well as the local company that provides water supply to the population was intensified. Adriatic Metals plans to transport the ore concentrate by rail to the port of Ploce. In this regard, the municipality of Breza is considered as one of the interested parties of the Project.

3.3 Project Affected Communities

3.3.1 Vulnerable Persons

Adriatic Metals will also consult specifically with people representing potentially vulnerable groups, such as the elderly, women, young people, the sick and disabled, and ethnic minorities.

In line with international best practice, the following measures were taken to enhance the ability of vulnerable groups to participate in the ESIA process:

- During the process of stakeholder identification and implementation of the SEP, identification and mapping of disadvantaged or vulnerable individuals or groups;
- Identification of consultation approaches, communication methods and activities that will support effective engagement of vulnerable persons (for example, where necessary, transportation subsidies can be provided to enable them to attend public meetings); and
- Ensure effective communication through identification of appropriate information dissemination methods and the appropriate use of language and non-technical writing across all community purposed documents to ensure accessibility to all vulnerable groups.

Stakeholder lists for this group will be updated continuously throughout the implementation of the SEP.

3.3.2 Communication of Gender Based Violence & Harassment (“GBVH”) issues internally and through the supply chain

Human Rights Policy regulates GBVH issues internally and through the procurement process. The policy itself states the following:

1. Prohibition of unlawful discrimination, inter alia, on the grounds of sex, ethnicity, religion or other characteristics, as well as unfair discriminatory practices with regard to employment, training and promotion; and
2. Decent treatment of workers and non-tolerance of any form of violence, abuse or harassment.

Furthermore, Adriatic Metals’s Procurement Policy commits to conducting due diligence, environmental risk assessment, social and human rights assessments related to their supply chain, monitoring these risks and proposing measures to avoid them.

Adriatic Metals is committed to incorporating these policies into corporate culture and practice. A mechanism for filing complaints, both internal and external, has been established. In addition to the above mechanism, complaints can also be submitted through the Whistleblower reporting mechanism, electronically and anonymously. The company is committed to adhering to all of the above procedures, and in the coming period will work on updating and improving these policies and procedures and their implementation.

3.3.3 Non-governmental and public or community organizations

This group includes all other people in society who may have an interest in the social and environmental impacts of the Project. It includes members of civil society organisations such as religious groups, cooperatives, cultural groups, village associations and environmental or social groups. Universities and other academic and research institutions running courses and undertaking work relevant to the Project are also included in this cohort (e.g. mining, sustainability, social and environmental issues, local and regional development, etc.). These institutions include Tuzla Mining Institute and the University of Zenica.

A register of all Non-Governmental Organisations (NGOs) currently working locally in Vares Municipality is presented in Appendix 2 of this SEP; this is maintained at the Vares Information Centre. As the ESIA disclosure proceeded, all relevant organisations were informed of project development, regardless of their opinion on mining and the project and were encouraged to engage with Adriatic Metals. This engagement has already been initiated, particularly with NGO groups who work with vulnerable persons.

3.3.4 Commerce and Industry

A range of different types of commercial organizations may be interested in the Project. These include:

- Local entrepreneurs, who may be affected by social and environmental impacts;
- Local businesses from elsewhere in the region, who may benefit by providing goods and services to the Project; and
- Other mining companies working in the local area and elsewhere in the region.

As the project develops and new contractors and service providers are identified, it is likely that these businesses will become important stakeholders as they establish contractual relationships with the project. A business directory for Vares Municipality is presented in Appendix of this SEP.

3.3.5 Project Employees

Project employees are recognised as stakeholders. It should be noted that not all employees will have the same interests. Employees will also include any contractors engaged on site.

3.3.6 Media

Adriatic Metals has already actively engaged with the primary media outlet in Vares, Radio Bobovac, which is a part of all events and activities of the company, with the Adriatic Metals logo currently displayed on the radio website. This radio station is widely listened to across Vares and is seen as one of the key methods of information and news dissemination in the area. It is proposed to have interactions with the station at least once a month, either through interviews or sharing information. Radio Bobovac has a Facebook and web page which have many followers who are members of the Bosnian diaspora. Further media stakeholders at the district level as well as at the regional and national levels will also be engaged.

Media stakeholders may have specific interests or queries about the project, and they may also be used to disseminate information about the project to other stakeholders. All information of interest to the project has so far been presented through the program of Radio Bobovac, and this media will continue to play a significant role in informing the public.

Social media is already utilised by multiple organisations across Vares Municipality for the dissemination of information, including the Vares Information Centre. Adriatic Metals has intensified the use of social networks in order to inform the local community and more distant stakeholders and the diaspora about the development of the project. Through social media, the company provides information relevant to the company and the local community in which it operates. Such information and content are created with great care and in accordance with the company's corporate policy. As the project progresses, the use of social media will be continued to inform the public about the project's activities. In monthly reports produced by the Information Centre an update on the level of engagement on their Facebook page is presented, allowing this to be tracked and therefore utilised effectively.

3.3.7 Multinational and International Organisations

Continuous engagement with international organisations can help identify regional development initiatives and improve coordination between the project and these activities.

In BiH, a range of different international organisations may have an interest in the project and may have useful data or insight into local and national issues of relevance to the project. These include:

- UN Development Programme;
- World Health Organisation in Bosnia;
- Council of Europe;
- Delegation of EU to BiH;
- Save the Blue Heart of Europe;
- Sava River Basin Agency;
- Adriatic Sea Watershed Agency;
- Agency for the Maintenance of the Danube River;
- European Bank for Reconstruction and Development;
- Bankwatch Network (environmental and human rights group); and

- USAID (United States Agency for International Development).

Several activities have occurred in Vares funded by international organisations including the repair, replacement or development of key infrastructure and studies on the legacy of previous mining activities. Work will be done to establish contact with these groups during the development of the project in order to identify other multinational groups that may be implementing programs in Zenica-Doboj Canton and that could express interest in the project.

Bosnia & Herzegovina is in an advanced state of accession application to the EU, being accepted as a candidate state in October 2022. Considering the life of project and Equator Principle aims, specific EU bodies will be or become Stakeholders as the project advances. Engagement with specific EU associated groups or bodies will be required, the method of which should be developed alongside the project.

4 STAKEHOLDER ACTIVITY ENGAGEMENT

4.1 Capacity Building

To facilitate meaningful participation of stakeholders as the project develops, activities aimed at education and capacity building will be supported by Adriatic Metals. These include:

- Making technical documents accessible to stakeholders to mitigate the perceived risks of potential negative impacts, as well as to manage expectations regarding positive impacts. This includes non-technical summaries of the ESIA and subsequent reports, as well as original documents, should the stakeholder be so inclined. Newsletters and project information sheets have been developed for the project and disseminated across the community. These are updated quarterly or when there is a significant publication or change in the project design or operations;
- Providing visual support alongside written information and explanations, as needed;
- Presenting the project's ESIA results in compliance with national and international best practice disclosure recommendations and legislation;
- Engaging local contractors and universities to undertake the environmental baseline and monitoring, where possible. Technical laboratories and specialist consultants can train Adriatic Metals staff to use environmental monitoring equipment, where relevant; and
- Developing a method of participatory monitoring, whereby the local community can observe, learn, and participate in the process of baseline data collection. For example, the placement of an air quality monitor at the churchyard in Vares, which is close to the high school in Vares, for students to learn about the process that Adriatic Metals are carrying out.

4.1.1. Action plan for communication with stakeholders January – December 2023

The implementation of all activities is the responsibility of the team for environment and social management, and in case of providing additional explanations, presentations and responding to inquiries from stakeholders, other teams will be involved, in order to achieve full information and transparency.

Activity	Stakeholder	Time period and frequency	Responsibility	Communication tools	Feedback/ records	Record
1. Project Phase Notices	Stakeholders	No later than 10 days after the official adoption of the Project phase or any of the strategic documents or Work Plans	All departments + department in charge of implementing and obtaining documents or work plans	Notices on bulletin boards, communication with representatives of local communities, through the Committee for Relations with the Local Community, through the company's social media, through the Info Centre, through Radio Bobovac	Inquiries and comments received through social media, e-mail or during meetings	Photo documentation and notices posted on bulletin boards, invitations to meetings, minutes of meetings, press clipping archive
2. Information and communication of the stakeholders on the progress of Vares Project	Stakeholders under direct influence	At least once before the start of construction work or other project activities. If there is a reasonable need or interest in the team	Sustainability team + department in charge of implementing works or project activities	Presentations, meetings with stakeholders, notices on bulletin boards, through the Public Liaison Committee, interview on Radio Bobovac	Feedback (comments, questions and suggestions) received directly through meetings	Photo documentation and notices posted on bulletin boards, invitations to meetings, minutes of meetings, press clipping archive

3. Information through the Info Centre	Stakeholders	Every working day from Monday to Friday in the period from 08:00 to 16:30	Info Centre Associate	Meetings with all stakeholders, oral communication, but also correspondence via email or social media Info Centre	Inquiries and comments received through social media, e-mail or during meetings	Minutes of meetings, register of visits to the Info Centre, correspondence by e-mail
4. Activities and work of the PLC	PLC members	Regular meetings of the Committee are held once every 3 months.	PLC members who are representatives of Adriatic Metals	Meetings of the PLC	Inquiries and comments received from the local community, inquiries from Committee members during the session, inquiries via the Committee's official e-mail address	Meetings minutes
5. Visit to households directly affected by the Project	Population belonging to the area directly affected	A new issue of the company's newsletter is published every two months, and then door-to-door visits to households are organized.	Sustainability team	Door-to-door visit - direct communication with residents. Given that this is the majority of the older population 65+, this is the only form of information about the Project	Inquiries and comments received during these visits	Newsletter distribution reports

6. Land acquisition	Owners of land that is of interest for purchase	For each plot of interest, the owner / owners are approached	Legal team responsible for the land acquisition process	Phone calls, communication by e-mail, meetings with owners of plots of interest, field trips to determine the actual facts	Inquiries and comments received during the meeting, mail correspondence	Minutes of meetings, written correspondence by e-mail
7. Communication with vulnerable categories (elderly, sick, women, children)	Vulnerable categories	Meetings every two months with vulnerable groups - when distributing the newsletter and visiting the household, communication with some of the vulnerable groups will be held every two months	Sustainability team	In addition to door-to-door visits for some of the vulnerable groups, small group meetings will be organized. All material used for information purposes will be adapted and easily understood, with the aim of better dissemination of information and communication.	Inquiries and comments received during the meeting	Minutes of meetings, received comments - orally or in writing by phone, text messages or e-mail.
8. Meetings with representatives of local communities	Representatives of local communities affected by the Project	From the beginning of the project activities, a meeting with representatives of local communities is organized monthly or as needed	Sustainability team	In addition to visits to local communities, meetings are also organized at the company's premises, telephone communication, written correspondence via e-mail or text messages	Inquiries and comments received through meetings	Minutes of meetings, received comments - orally or in writing by phone, text messages or e-mail.

9. Communication with the non-governmental sector	Representatives of various NGOs operating in the municipality of Vares	From the beginning of the project activities, meetings are organized with their representatives on each current topic that is of great importance for the Project, but also for the representatives of these associations	Sustainability team	Meetings - presentations, oral communication, but also correspondence via email or Info Centre	Inquiries and comments received during meetings, by email or through the Info Centre	Minutes of meetings, received comments - orally or in writing by phone, text messages or e-mail, register of visitors to the Info Centre
10. Complaints resolution mechanism - external	Stakeholders	Since the beginning of the project activities, all stakeholders, especially the population from the communities affected by the project, have been introduced to the grievance mechanism	Sustainability team	Meetings, oral communication, by phone, email or Info Centre	Inquiries and comments received during meetings, by email or through the Info Centre	Grievance mechanism register
11. Employee relations and health & Safety	Employees & contractors	Insert commentary on the worker's council, safety culture etc etc	HR & OHS etc	Etc	Etc	Etc

Table 4.1.1 Action plan for communication with stakeholders

4.1.2. Displaying of Information in Public

Key information documents that are developed including non-technical summary of the ESIA, as well as the full report, plus letters, newsletters, etc., are displayed in public at the following places:

- Vares Information Centre;
- Adriatic Metals Website;
- Bobovac Radio website;
- Site office at Veovaca Process Plant Site; and
- With local community representatives.

Community notice boards exist around Vares as well as in surrounding communities. In the communities of Borovica, Przici and Dastansko, Adriatic Metals BH set up new two-sided notice boards in August 2020, on which one side will serve the needs of the local community and the other for Adriatic Metals. Also, at the beginning of June 2021, at the request of the residents of Tisovci, a notice board was placed at the entrance to Tisovci. Billboards are used to advertise public hearings, open days, or community development events. Brief Project updates are also be posted on these boards, with advice on where to gain further information if required.

Document and reports, such as this SEP, that are too large to display on the notice boards are made available, in Bosnian, at the Info Centre and will be downloadable from the Adriatic Metals website and will be available to or through representatives of local communities.

Photo 4.1.2. Notice Board Borovica

4.2. ESIA Process Disclosure

4.2.1 Project Information Disclosure

The following project information has been and will continue to be disclosed to communities potentially affected by the project:

- the purpose nature and scale of the project;
- the duration of proposed project activities;
- any risks and potential impacts to the environment, worker health and safety, public health and safety and other social impacts on communities, and proposed mitigation plans;
- the envisaged consultation process, if any, and opportunities and ways in which the public can participate; and
- time/venue of any envisaged public meetings, and the process by which meetings are notified, summarised, and reported.

Ongoing disclosure as the project progress is required, as detailed in this updated SEP. Disclosure of planned activities is required prior to the commencement of any phase of the project (i.e. construction, operation, closure) and when any major changes in infrastructure or activities are planned.

The programme for early site works and associated activities were disclosed to stakeholders ahead of time. Vares Municipal council, cantonal authorities, lenders and equity partners, local and national NGOs and local communities will continuously be informed of these activities, as well as other Project information or changes, through the following means:

- One to one meetings where appropriate;
- Through the public liaison committee;
- Radio Bobovac announcements;
- Newsletter to be distributed to key community residents;
- Notice Board announcements; and
- Company social media pages.

Disclosure of the following items will be carried out where there are project aspects that could present risks to communities, or when specific community concerns have arisen, not less than annually:

- periodic reports on Environmental and Social Action Plan (ESAP) implementation;
- issues that involve ongoing risk to communities; and
- issues that have arisen due to ongoing consultation or through the grievance

mechanism that identify as concerns of the community.

4.2.2 Record Keeping and Monitoring

Stakeholder engagement activities will be periodically evaluated by Adriatic Metals's senior management. The following indicators should be used for evaluation:

- Level of understanding of the project by stakeholders;
- Annual grievances received and annual success rate of implementation and resolution of complaints; and
- Level of involvement of Affected People in committees.

To measure these indicators, the following data will be used:

- Issues and management responses linked to minutes of meetings;
- Monthly reports from Vares Information Centre;
- Feedback from primary stakeholder groups (through interviews with sample of affected people);
- Issues raised at the Public Liaison Committee;
- Grievance register; and
- Commitments register.

During the disclosure period, the following aspects were recorded:

- Attendance registers and minutes from all meetings, including the PLC, focus groups and one- to-one meetings;
- Transcripts of radio broadcasts;
- Open House attendance registers and meeting notes;
- All queries from stakeholders and responses provided, across all activities;
- Report on newsletter distribution; and
- Social media and website traffic/download statistics.

A disclosure report has been compiled covering each of the aspects.

4.3. Vares Information Centre

The Vares Information Centre, located on the main street of Vares was opened in 2019. The centre is open from 08:00 until 16:30 Monday to Friday and it is closed on weekends and Public Holidays. There is one member of full-time staff.

The aim of the Information Centre is to continue developing a two-way cooperative relationship with the community, to satisfy their requirements in terms of information dissemination and to collect comments and feedback on the Project and current activities. This is monitored through the recording of all stakeholders visiting the centre. Should a community member ask a question where the team are unsure of the answer, then the query will be passed to senior management to respond. The Information Centre also operates a formal complaints procedure, should a member of the public come in with a complaint this is recorded in a dedicated form and passed to the appropriate to senior management.

A report is prepared monthly by the Information Centre, providing a summary to company senior management and directors. This covers total number of visitors and queries, the most common questions and discussion, any outstanding issues and an overview of social media presence and outreach during that period. The primary queries brought up by visitors to the Information Centre include:

- Employment opportunities;
- Accommodation offer for workers;
- Company sponsorship of local events / teams;
- General enquires regarding status and activities of Project and
- Adriatic Foundation.

The Information Centre administers a formal grievance mechanism, discussed in Chapter 5 of this SEP, as well as the formal register of stakeholders engaging at the centre and a record of all donations, requests and sponsorship carried out by the company. All Project related documentation such as the Scoping Study, Environmental Assessment for local permitting procedures, international ESIA and management plans, NTS And ESAP plus, non-technical summaries of all technical aspects and the permitting register will be available on request. Any interested party can submit their request through the Information Centre. Having this information to hand will assist the Adriatic Metals employees in ensuring all responses to queries are consistent and accurate.

Should anyone wish to pass a query on to senior management, a contact form can be filled in. This form allows the stakeholder to state their concern or query, providing formal written documentation. This is passed on as appropriate and stored electronically in line with GDPR requirements.

The Information Centre is an invaluable resource for Adriatic Metals and has thus far been effective and efficient in engaging with community members. This will need to continue throughout the life of the Project.

4.4. Community Investment Initiatives

Adriatic Metals follows a two-tier approach to its Corporate Social Responsibility (“CSR”). A charitable foundation is funded by Adriatic Metals but has a charter and trustees that are independent of the Company. Initially the “Adriatic Foundation” is funded directly by the Company. When processing operations start, a percentage of profits will be granted to the Foundation each year. The potential to gift shares into the foundation is also being considered. The Adriatic Foundation also holds 250.000 shares in Adriatic Metals PLC, which is ASX and LSE listed (ASX:ADT, LSE:ADT1). Five trustees are elected (three from Vares, one from Kakanj and one single trustee from Adriatic Metals BH d.o.o.) and an independent Director of the foundation is appointed to administer the Foundation. The nominated trustee from Adriatic Metals is the Head of Sustainability. The foundation’s charter clearly emphasises its requirement to support long-term social investment in the areas of education, health, and the environment. The Adriatic Foundation is designed for the long-term well-being and support of the communities in which the company operates. Adriatic Metals will continue its sponsorship practice in the coming period, and all other donations will be considered and processed through the Adriatic Foundation.

In accordance with the goal of supporting projects in the field of education, the Adriatic Foundation on 2 November 2021 announced a competition for scholarships for pupils and students from the municipalities of Vares, Breza and Kakanj. The competition lasted 15 days and the Foundation received 46 applications. At the extraordinary session, held on November 30, 2021, the Board of Trustees formed a list of 25 scholarship holders of the Adriatic Foundation. In addition, the Foundation received an amount for two more scholarships from associates of Adriatic Metals and the Adriatic Foundation, and the total number of scholarships awarded to high school and university students is 29 as follows:

- Municipality of Vares high school students – 15;
- Municipality of Breza high school students – 5;
- Municipality of Kakanj high school students – 6;
- college students - 3 (one student from each municipality).

On 23 December 2021 the signing of the scholarship agreement with the scholars and their parents was organized as the final step in the process of awarding scholarships to the Adriatic Foundation.

In April 2022, the Adriatic Foundation announced a call for a free English language course for all interested residents of the municipality of Vares, regardless of gender and age. During the ten-day duration of the call, 227 applications were received, and cooperation was achieved with the language school Facultas Cambridge Center Sarajevo, whose professors will teach English for 6 months. The course officially started on 1.6.2022. and is held four days a week in the premises of High School "Nordbat-2" Vares, which has given two classrooms for free use for the purposes of the course. In addition, in June, the Adriatic Foundation started providing scholarships to three diabetic children from the municipality of Vares who need help buying sensors to measure sugar in their blood. The scholarship will last for 10 months.

The Adriatic Foundation on August 15th 2022 published a public call for funding/co-financing of environmental protection NGO projects from the municipalities of Vares, Breza and Kakanj. The call lasted 15 days. At the session held on October 10th, the Board of Trustees decided that the Adriatic Foundation will support two projects, namely:

- Sports fishermen Association Vares - Arrangement and stocking of the natural fish hatchery Mala Rijeka – Vares;
- Mountaineering and skiing association "Perun" Vares - "Eco current phase II".

At the session held on October 12th, the Board of Trustees made a decision to repeat the Call for co-financing of NGO projects for environmental protection due to the weak response of NGOs from Breza and Kakanj to the previous Call. In this regard, the Foundation is on November 2nd 2022 published a new call that lasted a month.

Associations and projects for which funds have been approved by the Adriatic Foundation are:

- Scout association "Zvijezda" Vares - Project "I love nature, I love Vares";
- Hunting society "Zvijezda" Vares - Project "Modernization of hunting technical and hunting breeding infrastructure";
- Sports fishing society - Project "Preservation, protection and improvement of fish stock through actions to preserve natural and artificial stocking";
- Association for the protection of animals "Skitnica" Kakanj - Project "Don't litter nature and flowers";
- Eco association "Medena dolina" Kakanj - Project "Let's protect nature - a disappearing treasure";
- Association Center for Ecology and Sustainable Development (CEKOR) Kakanj - Project "Celebrating Earth Day 2023";
- Association Rescue Club GSS Kakanj - Project "Cleaning, arrangement and marking of the hiking trail Bukovica - Bobovac".

The Company will continue to make localized, and potentially short-term community investment initiatives, some of which have already taken place. This funding is accompanied by criteria and guidelines for Corporate Social Responsibility that Adriatic Metals can support. The procedure that ensures that the management of Corporate Social Responsibility funds is transparent and fully documented was developed under the supervision of the General Manager and the Head of the Sustainability Department. This includes the responsibilities and accountabilities for staff members at the Information Centre as well as a mechanism for reviewing or monitoring the success of the initiatives supported (including number of beneficiaries, duration of benefit, category of support etc.) and is available to the public at the Info Centre.

Adriatic Metals has developed a Living history project that includes interviews with those who worked in Vares mines or related industry or who remember life in that period, preserving the heritage and establishing a valuable source of data on the mining past in the area. A graphic "Timeline" charting the development of Vares as a mining community over the ages is on display in the Company's offices. The timeline was unveiled at the PLC meeting in October 2020 during the group's visit to the company.

4.5. Public Liaison Committee

A PLC has been established for the Vares Project. The main purpose of the PLC is the promotion of understanding by the local communities of key issues across the life of the mine, and thereby preventing or resolving any potential issues as they arise. The PLC meets once every three months.

The group has been given the following responsibilities:

- Advising the Company on the issues and interests of local communities;
- Identifying and informing potential interests and needs of the local residents with regard to the activities of the company;
- Attending regular meetings in the course of a year;
- Preparing for meetings by being familiarised with Adriatic Metals documents;
- Attending topic-specific workshops or seminars around key issues, including explanations of technical processes;
- Attending ESIA workshops covering the international ESIA process and local EIA permitting process, findings of the baseline study and predicted impacts, highlighting areas for involvement in monitoring;
- Distributing key information related to the PLC meetings to as many community members as possible; and
- Acting as a third-party consultee in the formal Grievance Mechanism.

4.6. Documentation and Issues Management

Documenting the stakeholder engagement process, activities and results is crucial for managing risk and ensuring transparency. The Information Centre in Vares has successfully started this process and records all stakeholders visiting the centre including name, age, place of residence, gender, current occupation, and reason for visit. If necessary additional information is taken regarding education level, qualification, previous experience. CVs are also collected and held on file for consideration by the project's HR department.

As the project progresses the number of enquiries is likely to increase. Therefore, the methodology for documentation should be robust and simple, developed based on the current progress. Processes and procedures should be documented to be able to demonstrate how stakeholder engagement was organised and implemented. Documentation also allows outside observers, such as foreign investors or international organisations, to understand what information was provided, and how and what topics were raised during stakeholder engagement activities.

The key deliverable of public consultation during the ESIA process was a detailed report of the disclosure process, including a log and a record of all stakeholder comments, issues and suggestions, in the form of an Issues and Response Report. This report will serve as an ongoing record of stakeholder issues raised throughout the process.

4.7. Current and Future Stakeholder Engagement

Stakeholder Engagement, in addition to that described above occurs regularly between Adriatic Metals staff and all levels of Stakeholders. Adriatic Metals management have now begun meeting with the Vares Municipality Council on a regular basis. Additional forms of stakeholder consultation that are carried out by Adriatic Metals. includes the following:

- Project leaflet dissemination across all closest communities;
- Home visits, particularly to those residents who are more isolated and do not visit Vares on a regular basis. This will provide a method of information dissemination and dialogue to some identified vulnerable groups;
- Information through notice boards in local communities affected by the Project, where updated information about the Project is regularly posted; and
- Updates of all activities via Radio Bobovac.

Adriatic Metals is committed to continue supporting stakeholder engagement activities throughout the project cycle, including after closure. This SEP will therefore be updated and developed, and culturally appropriate methods to maintain a two-way dialogue with those affected, both positively and negatively, will continue to be developed by Adriatic Metals BH. The aim will be to ensure that the project remains in contact with all interested parties and addresses their concerns in an effective and timely manner.

4.8. Key Stakeholder Issues

Table 4.2. summarises the most common stakeholder concerns and issues raised in engagement to date.

Table 4.2. Community Concerns to Date		
Aspect	Concern	Undertaken activities

<p>Health</p>	<p>Perceived that previous mining operations resulted in increased cases of cancer and respiratory problems, as well as leading to the death of livestock. Particularly of concern in Dastansko and Przici.</p>	<p>In response to local health concerns, Adriatic Metals commissioned a health impact assessment by a licensed company.</p> <p>There is currently one health centre in Vares. It is expected that the Project will significantly increase the number of inhabitants in Vares, and there is a risk that the Health Centre could be overloaded due to that. In 2022, Adriatic Metals has established a new health centre in Vares, and is in agreement with a private health care provider. It is intended that all employees have private health insurance, as well as their spouse/partner and those who depend on them. The clinic is upgraded to an existing facility in Vares, and all services will be available to the community as needed. Also, the Community Health and Safety Management Plan defines potential risks and mitigation measures and recommendations that the company should follow during the Project.</p>
---------------	---	---

<p>Employment</p>	<p>Community members are very hopeful regarding the Project, many are expressing a great desire to work at the mine. Many questioned employment and training opportunities given the scope of the new Project and how they could apply for roles created. This process will need to be managed by a local employment strategy. Stakeholders also expressed their desire for local procurement to be prioritised.</p>	<p>By applying the employment strategy, the company has defined that: a) The Municipality of Vares and the surrounding area will be a resource for the majority of the workforce; b) Involvement and partnership with local businesses whenever possible to help expand the local economy;</p> <p>c) Building a development strategy that addresses the lack of job creation skills, working with the local high school to open a new educational course for students and finally securing employment for students who complete this educational course</p> <p>d) Providing opportunities for retraining for adults, thus providing employment opportunities.</p> <p>The development of the Vares Project will result, and has already resulted, in employment opportunities during the period of development, construction, operation and closure. While the construction and transport works will be carried out by contractors, Adriatic Metals has committed itself to ensuring that these contractors are local and employ a large part of the local population. Several indirect economic opportunities for local companies and contractors are likely to emerge in favor of the mine. Adriatic Metals also undertakes to give priority to local entrepreneurs, and procedures have been established to assist local developing companies to meet the needs of the Project.</p>
<p>Environmental</p>	<p>Due to previous contamination there was a concern that the same could happen again regarding water courses, air quality and biodiversity. Concern over water usage by project operations and maintenance of the natural flow.</p> <p>During demolition there were concerns from community members regarding the dust, noise and public health and safety issues associated predominantly with truck movements. These concerns were dealt with and mitigation implemented.</p>	<p>From May 2020 to the end of May 2021, baseline monitoring of environmental parameters has been established in order to obtain data on the overall state of the environment and it will be continued through all phases of the Project in order to monitor the state of the environment. The environmental team worked with leading engineering consultants, Wardell Armstrong and Ausenco, as well as the best licensed companies in the state, to ensure that the FS complied with ESIA requirements.</p>

5 GRIEVANCE MECHANISM

The purpose of the grievance mechanism is to demonstrate responsiveness to stakeholder complaints and ensure stakeholder engagement throughout the Project. All stakeholders are encouraged to submit written grievances to Adriatic Metals's management team and should be reassured that submissions will not be used in any way to intimidate those submitting the complaints. The grievance mechanism is resolved quickly and efficiently in a transparent manner that is culturally acceptable without manipulation, interference, coercion, intimidation, and retaliation⁴.

All interested parties can get a copy in the Information Centre, or at the office at Tisovci, through representatives of local communities and on the company's website. From January 2021, the introduction of anonymous submission of grievances is in process. Mailboxes are available for complaints in communities where the project has a direct impact, in places where notice boards are placed. Available mailboxes are checked once a month. The procedure outlined below is used to ensure the grievance mechanism is in line with international best practice requirements.

Any questions or suggestions about the works and activities performed by Adriatic Metals should be sent by e-mail: infocentar@adriaticmetals.com.

5.1 Definition

A grievance is a concern or complaint raised by an individual or group affected by Adriatic Metals's activities. Both concerns and complaints can result from either real or perceived impacts of a company's activities and may be filed in the same manner and handled with the same procedure. The grievance procedure should be used by everyone without concern or fear of retribution. According to the UN Guiding Principles on Business and Human Rights, the company's grievance mechanism has been developed in a way that is accessible, predictable, fair, transparent and based on inclusion and dialogue⁵.

A grievance is not:

- A question, suggestion or general comment on the company or project; and/or
- An appeal or request for assistance.

These forms of feedback are also relevant to Adriatic Metals and are currently being recorded at the Information Centre, but they should not be officially listed as grievances.

The grievance mechanism process currently in place for Adriatic Metals is presented in Figure 2. The process has multiple stages and levels of review as the grievance progresses. Nominally, this covers the following aspects:

⁴ EBRD Performance Requirement 10: Information Disclosure and of information and Stakeholder Engagement

⁵ UN Guiding Principles on Business and Human Rights

- receiving and recording the grievance;
- inspection and investigation;
- response; and
- an appeal process.

A grievance form (Figure 3.) has been developed, requiring the following information:

- *Name;
- *Contact Details;
- *Age;
- *Gender;
- Title of Grievance;
- Location;
- Date and time of incident;
- Description;
- *Signature or stakeholder;
- Signature of Adriatic Metals receiving employee; and
- Date logged.

If stakeholders choose to submit an anonymous complaint, the items marked with an asterisk will not be filled in.

The grievance mechanism has now been rolled out across all closest communities through in person meetings and telephone calls, due to the C-19 restrictions. Community leaders have distributed information regarding the grievance mechanism and during household surveys, the implementation of the mechanism is checked and tested with community members. During the first session of the Public Liaison Committee, the members were also introduced to the grievance mechanism and copies of it were handed to them. The proposal is that if an anonymous complaint is filled, the answer to it will be submitted on the notice board of the local community where the complaint was filed and, the representative of the local community will be informed. If the complaint is filed in another way (Info centre), the answer will be forwarded through other Adriatic Metals's social channels, social media, or newsletters.

6 MONITORING AND EVALUTION

Stakeholder engagement activities will be periodically evaluated by Adriatic Metals senior management. The following indicators should be used for evaluation:

- Level of understanding of the project by stakeholders;
- Annual grievances received and annual success rate of implementation and resolution of complaints; and
- Level of involvement of Affected People in committees.

To measure these indicators, the following data will be used:

- Issues and management responses linked to minutes of meetings;
- Monthly reports from Information Centre;
- Feedback from primary stakeholder groups (through interviews with sample of affected people);
- Issues raised at the Public Liaison Committee;
- Grievance register; and
- Commitments register.

These evaluation reports will be presented to Adriatic Metals management and a summary of results provided for the Annual Report. A regular evaluation should be conducted by an independent consultant using a perception survey, which uses the same set of questions over time to achieve continuity. Analysis of the survey will be presented to the management team. The first survey should be conducted before major construction work to provide a baseline for community perceptions.

7 REPORTING

The Social Responsibility Manager defines, manages, and coordinates all activities defined by the Stakeholder Engagement Plan, including:

- Public Outreach activities (letters, meetings with stakeholders, newsletters, appearance on Radio Bobovac, meetings with municipality council);
- Progress on any CSR, community development or community collaboration projects;
- Resolving complaints received, according to the procedure set out in the Grievance mechanism;
- 'Living history'⁶ project interviews and cooperation with Vares library, high school and Tourist info centre on establishment of previous and current history data;
- PLC information and activities;

⁶ A project to record the oral histories of local people who lived and worked in the area when the mines and foundry were active. The recordings and information will be shared with Radio Bobovac, Vares library, high school and the Tourist Information centre. Interviews are also published in the Adriatic Metals BH d.o.o. Newsletter.

- Plans for proceeding month and progress of long-term plans; and
- Other relevant information and activities.

Monthly reporting is currently being undertaken at the Vares Information Centre focused on visitors to the centre and social media statistics. This reporting includes:

- Activities conducted during each month;
- Entries to the grievance register;
- New stakeholder groups (where relevant); and
- Social media statistics from Adriatic Metals official Facebook page and Radio Bobovac Facebook page (including media statistics on followers from diaspora).

The management team will use these Information Centre reports to complete the annual report on Environmental and Social Management.

8 STAFF

One member of staff is engaged at the Vares Information Centre working full time.

The role broadly covering the following:

- Engage and create a presence within the Vares community;
- Develop and maintain functional relationships with key stakeholders;
- Engage with the larger community: organize public events and meetings, disseminate public information; and
- Collect feedback from community members (concerns, issues, questions), register them and convey to senior managers.

An environmental and social team has now been established by Adriatic Metals, operating from the site office in Tisovci. The team comprises of Head of Sustainability, Vildana Mahmutovic, whose responsibilities include management of the overall international impact assessment, local permitting procedure and the social and community engagement and Aida Ahmedovic, Social Responsibility Manager. Ten members of the team provide support of the work of the Head of Sustainability including a new social team member appointed from Kakanj.

Because of war events, and as one of the forms of resocialization and inclusion of disabled people in social flows and provision of psycho-physical rehabilitation, the idea of forming a sitting volleyball club was born. A group of enthusiasts among the disabled population of the Kakanj municipality, educators who worked on the development of volleyball before the war, as well as former volleyball players, helped create the physiognomy of the team by participating as coaches.

In addition to the disabled volleyball club "Kakanj 92", the following sections also operate within the "Kakanj 92" sports association for disabled war veterans: mini football, shooting, bowling and chess selection.

60. Kakanj Municipality Youth Council

Non-governmental organization - Youth Council - an advisory body that makes suggestions and views to the mayor and municipal services on all issues related to the youth population.

61. Cultural and artistic association "Fadil Dogdibegovic - Dikan" Kakanj

The cultural and artistic society "Fadil Dogdibegovic Dikan" from Kakanj recently celebrated 75 years of successful work and existence. Everything, they say, started in the fall of 1947, with the spontaneous organization of parties and cultural programs, so that, a few years later, they would officially go to Bosnia and Herzegovina. cultural scene. In these 75 years, they toured all over BiH, Yugoslavia, but also abroad: France, Hungary, Germany, Czechoslovakia, Switzerland, Turkey, ...

The society has active sections: Mixed Choir, Children's Folklore Section, Folklore Section for Younger Ages and Folklore Section for Older Ages, Folk Orchestra and Technical Section, through which thousands of members, mostly young people, have passed through in the past years, thousands have been presented hours of cultural and artistic program.

62. Tennis club "Taib's transversal of tennis in winning the game"

The mission of the Association of Employers of Kakanj Municipality "Business Support Center" Kakanj is to act in the direction of creating a positive and stimulating business environment, attracting domestic and foreign investors, stopping the trend of decreasing the number of unemployed and gradual increase in the real sector.

We are in favour of reducing the rate of contributions and taxes, financial discipline, abolition of illegal work, reduction, and abolition of parafiscal levies, resolution of internal insolvency.

The purpose of the association and gathering of businessmen in the Association is organized performance towards the competent state bodies, the promotion of entrepreneurship and its development, and the provision of professional and other assistance to the members of the Association in their work.

63. Benat pool

Association of citizens whose goal is to encourage the local community, and all interested parties about the need to build an indoor swimming pool in the municipality of Kakanj.

Given that the Adriatic Metals is actively working on a strategy of access and engagement in the area of Kakanj Municipality, that it plans to carry out its socially responsible work in cooperation with non-governmental organizations operating in the area of this municipality, some of the planned activities were successfully implemented.

The applications of four non-governmental organizations from the area of the Kakanj municipality were financially supported through the grant program of the Adriatic Foundation, in part or in full. These are the projects:

- I. Lifeguard club GSS Kakanj with the project "Cleaning, arrangement and marking of the hiking trail Bukovica - Bobovac".
- II. Eco association Medena dolina Kakanj with the project "Let's protect nature - a disappearing treasure".
- III. Animal Protection Association Skitnica with the project "Don't throw trash on nature and flowers".

IV. Association CEKOR "Observation of Earth Day 2023".

In addition to the support program of the Adriatic Foundation, the Adriatic Metals also supported sports and recreational associations with the aim of achieving cooperation. In the holding of the Taekwondo tournament "Kakanj Open 2023" and the night street race "Kakanj for 5", Adriatic Metals participated financially as a gold sponsor. Also, cooperation was achieved with the volleyball club "Kakanj 78" in the form of sponsorship for three years.

In addition to the above, more active cooperation with the sector of non-governmental organizations is planned soon.

APPENDIX 3
PROJECT AFFECTED COMMUNITIES VARES AND KAKANJ

Appendix 3 - Project Affected Communities - Vares

Within the Vares municipality, 24 local community centres exist comprising of 81 settlements. Within Kakanj municipality there are 42 local community centres comprising of 108 settlements. The closest community centres and identified key communities are shown in a stakeholder mapping exercise, presented in Appendix 1, which has identified three levels of community, defining the social area of influence. These categories are as follows:

- Key Communities – Those directly affected by mining activities due to close proximity, influx of workers and those likely to see noticeable demographic changes, these communities have been taken into account in the household survey for social baseline collection;
- Secondary Communities - Unlikely to be directly impacted by mining activities and infrastructure but lie within close proximity and will therefore see some change;
- Wider communities of interest – currently identified as those in surrounding areas and those who have shown interest in the project by visiting the Information Centre. These communities delineate the wider area of influence and form a triangle between Zenica, Tuzla and Sarajevo.

The communities included within these three categories will be continuously reviewed and updated throughout the stages of the Vares Project implementation and as stakeholder engagement activities are advanced.

<p>NB: Data is taken from the Vares municipality Overview of local communities, 2021. And Overview of local communities from the Kakanj municipality, 2023</p> <p>* Indicates Key communities, considered in depth within the social baseline and household survey.</p> <p>**Data source: Federal Office of Statistics</p>			

At the end of 2021, elections were held in the municipality of Vares to appoint new presidents of local communities. In most local communities, the same presidents remained in post, while local communities Pogar, Vares Majdan and Vares elected new presidents as follows:

1. MZ Pogar - Milijan Pasalic
2. MZ Vares Majdan - Muris Cizmo
3. MZ Vares - Nurdin Begovic

Also in the Kakanj municipality, new presidents of the Nazbilj and Vukanovici local communities were elected:

1. MZ Nazbilj – Hikmet Salkic
2. MZ Vukanovici – Darko Pejanovic

Adriatic Metals has actively engaged with leaders of the closest communities and villages, namely Borovica, Pogar, Vares, Vares Majdan, Dastansko and Przici (Tisovci is part of the community of Przici). Already well established, this engagement will continue throughout project life on an ongoing basis regarding all aspects of the project that may impact their regulatory and other responsibilities. Engagement with community leaders in Kakanj and Breza has been initiated and will be developed as the project progresses.

In this regard, in March 2022, meetings were held with representatives and residents of the local communities of Nazbilj and Vukanovici (Kakanj Municipality) with the aim of introducing the company to the mentioned local communities and creating good relations. The meetings were attended by the president of the community Nazbilj, Hikmet Salkic and the president of the community Vukanovici, Darko Pejanovic, and representatives of the Adriatic Metals company. At the meetings, the working method of the mine and its impact on the environment and the local population were presented. On

this occasion, residents were handed the Non-Technical Summaries of Environmental and Social Impact Assessment (ESIA).

After the mentioned initial meetings with the presidents of the local communities of Nazbilj and Vukanovici, 25.3.2022., the first informative meeting was held with the population of the local community of Nazbilj, which was attended by 29 residents of the community of Nazbilj, while on 8.5.2022. held a meeting with the residents of the community of Vukanovici. The meetings were held with the aim of familiarizing the population with the Project and creating good relations and successful cooperation.

Additional communities are in the wider project area of influence, anticipated to see an indirect impact. Members of these communities have shown interest in the project by visiting the Vares Information Centre. The surrounding communities utilise Vares for multiple services such as the health centre, library, cafes and shopping. The communities, comprising multiple villages, include the following:

- Javornik;
- Strica-Zarude;
- Stupni Do;
- Strijezevo;
- Budozelje;
- Mir;
- Ocevija;
- Dubostica;
- Ligatici;
- Vukanovici;
- Bastasici and
- Dabravine.

As the project progresses additional meetings with these other community leaders will take place, ensuring that all potentially directly and indirectly closest impacted communities remain informed and included in the Vares Project's development. Informing the local communities and the population that are directly and indirectly affected is continuously done through various communication channels: through notice boards, religious communities, the Tourist Info Centre, Radio Bobovac, Vares General Library, and through meetings of the Public Liaison Committee and notice boards in the Project affected communities.

Adriatic Metals understands that Project-Affected Communities should not be considered as one stakeholder group, as individuals and groups may have numerous and diverse interests. Affected individuals will be consulted directly and via their representatives, including community leaders and other influential people, such as school principals, head of police and religious leaders.

The Project area is home to a generally ageing population. During the Bosnian war, many community members were displaced from the Vares region; additionally, post-war, many residents moved away to other cities in BiH or abroad. This is a unique scenario and stakeholder engagement with land and property owners within proximity to the Project, who are no longer present in the region, will need to be managed separately to the consultation with local residents. Cooperation was established and meetings were intensified with representatives of local communities affected by the project, but also those not directly affected by the project to cover the entire area with relevant information.

Appendix 3 – Project Affected Communities – Kakanj

In the municipality of Kakanj there are 45 local communities consisting of 108 settlements. The closest local communities and key communities by location or interest are defined in Table 3.1. Stakeholder mapping, presented in Annex 1, identified three levels of community, defining the social sphere of influence. These are the following categories:

- Key communities by location and interest – communities that are directly affected by mining activities due to close proximity, influx of workers and those that are likely to experience noticeable demographic changes;
- Key communities of interest – Communities that are unlikely to be directly affected by mining activities and infrastructure, but are located in close proximity and will therefore experience some changes;
- Secondary communities of interest – currently identified as communities located in the surrounding areas and those who have shown interest in the Project by visiting the Information Center. Secondary communities represent a wider area of influence and form a triangle between Zenica, Tuzla and Sarajevo.

The list of communities included in these three categories will be constantly reviewed and updated during the implementation phases of the Project and the progress of stakeholder engagement activities.

Table 3.1. Key communities, community presidents and population, 2023			
Local community	Included settlements	Representative	Population
Municipality of Kakanj			
Nazbilj	Nazbilj	Hikmet Salkic	176
	Bastasici		122
Vukanovici	Vukanovici	Darko Pejanovic	218
	Lipnica		58
	Zlokuce		2
	Slagoscici		0
<p>Note: The data was taken from the Overview of Local Communities of Kakanj Municipality, 2018. * Denotes key communities, which are considered in detail within the framework of the social study and household survey. ** Data source: Federal Statistical Office</p>			

As part of the strategy of active engagement in the local community, the municipality of Kakanj, the Social Responsibility Department of the Adriatic Metals successfully held initial meetings with the presidents of 12 local communities. The reason for initiating the meetings by the department is to introduce the president to a new member of the department, an associate for social management, whose responsibilities are related to communication and engagement in Kakanj Municipality.

In addition to the above, the topic of the meeting was information on the current activities, works and operations of the Adriatic Metals, which provides all the necessary and required information to all interested parties with its honest and transparent approach to the local community.

Out of a total of 45 local communities that exist in the Kakanj municipality, 12 local communities together with Vukanovici and Nazbilje have been singled out as an interest group.

Apart from the two previously mentioned which belong to the group of key communities, the other ten make up:

- Trsce;
- Zgosca;
- Kakanj I;
- Kakanj II;
- Doboj;
- Catici;
- Brezani;
- Bjelavici;
- Haljinici;
- Kraljeva Sutjeska;

APPENDIX 4
PUBLIC LIAISON COMMITTEE

Appendix 4 – Public Liaison Committee – first and second convocation

The first convocation of the Public Liaison Committee was elected in 2020. The PLC included a certain number of voluntary members representing all sectors of the community, including representatives of local communities that are exposed to the direct impact of the Project, representatives of the most important institutions in Vares such as the Police Station, the Health Centre, the General Library of Vares, the Forestry Administration, the Tourist Info Center, PUK Vares (communal services), representatives of non-governmental organizations, representative of Kakanj Municipality, representative of Public Enterprise VODOKOM d.o.o. Kakanj, business owners and municipal authorities. From June 2021, a member from the municipality of Breza joined the PLC. When selecting these members, the representation of younger and older people, women, members of all national, ethnic, and religious groups and different professions was considered. The independent chairman and deputy chairman of the PLC were elected. The PLC had a total of 30 members, and at the founding meeting, their proposals for changes to the Rules of Procedure of the Committee were adopted, including the payment of justified transportation costs for those who attend each meeting.

Since the establishment of the Public Liaison Committee, 10 sessions of the first convocation of the PLC have been held as follows:

Since the establishment of the PLC, seven sessions have been held, as follows:

- 26.7.2022. – 10th session of the Public Liaison Committee was held in the hall of the Vares Municipality. Since this was the last session in this convocation, the main topic was review of the committee's work in the previous two years. At this session, the members of the Committee were surveyed about the work of the PLC in the previous two years with the aim of evaluating and improving the work of the next convocation of the Committee.
- 28.4.2022. – the 9th session of the Public Liaison Committee was held in the hall of the Municipality of Vares. The main topic of this session, in addition to current and planned activities, was the beginning of the construction phase of the construction of the polymetallic mine in Rupice.
- 24.02.2022. - 8th session of the Public Liaison Committee was held in the hall of the Municipality of Vares. The main topics were construction works at Rupice and employment procedure. Beside that, current and implemented activities are presented as well as 2021 overview. The eight session was planned for the end of January, but due to epidemiological situation it has to be delayed.
- 29.10.2021. - 7th session of the Public Liaison Committee was held in the hall of the Municipality of Vares. In addition to current information on implemented and planned activities, a presentation of the Environmental and Social Impact Assessment (ESIA) was held at the session.
- 29.07.2021. - 6th session of the Public Liaison Committee was held in the hall of the House of the Local Community of Borovica. In addition to the usual topics and agenda, the route of the road Rupice - Tisovci was presented at the session, and a visit to the Rupice site was organized so that the members of the Committee could see on the spot how the drilling process is going,
- 28.04.2021. - 5th session of the Public Liaison Committee was held in the hall of the municipality of Vares. In addition to the presentation of the company activities, the project

of the new route Rupice-Tisovci was presented as well as the initiative of the new educational course in Vares High school - miner in underground exploitation.

- 28.01.2021. - 4th session of the Public Liaison Committee was held in the great hall of the municipality of Vares. The topic around which the members of the committee showed the most interest is the establishment and work of the Adriatic Foundation and the establishment of a new direction in "MSS NORDBAT 2" Vares,
- 1.10.2020. - 3rd session of the Public Liaison Committee, which is characterized by presentations by representatives of Adriatic Metals on the activities and work of the company so far in the Vares municipality and numerous questions from representatives of the local community,
- 15.7.2020. - 2nd telephone session at which, due to the pandemic and the situation caused by C-19, a telephone vote was held on the adoption of the Draft Rules of Procedure and Minutes from the first session of the Public Liaison Committee,
- 9.6.2020. - 1st founding and constitutional session at which the Draft Rules of Procedure of the Public Liaison Committee and the Code of Conduct for the Members of the Public Liaison Committee were adopted.

The second convocation of the Public Liaison Committee was elected in 2022. The PLC includes a certain number of voluntary members representing all sectors of the community, including representatives of local communities that are exposed to the direct impact of the Project, representatives of the most important institutions in Vares such as the Police Station, the General Library of Vares, the Forestry Administration, PUK Vares (utility services), non-governmental organizations representatives, representative of Public Enterprise VODOKOM d.o.o. Kakanj, business owners and municipal authorities.

Since the establishment of the second convocation of the PLC, two sessions have been held as follows:

- 16.2.2023. – 2nd session of the Board, characterized by presentations of Adriatic Metals's activities and the presentation of the company's new management, general manager Matthew Hine and executive director Alem Logo.
- 9.11.2022. – 1st constitutive session of the Board at which the President and Deputy Presidents of the PLC were elected and the members of the PLC, representatives of the Adriatic Metals were presented. In addition, the PLC members are familiar with the basic acts of the Public Liaison Committee, the Rules of Procedure, and the Code of Conduct.

APPENDIX 5
CONSULTATIONS BEFORE AND DURING THE ENVIRONMENTAL AND SOCIAL IMPACT ASSESSMENT
(ESIA)

Appendix 5 - Consultation before and during the ESIA process

Stakeholder consultation is a vital component of the ESIA process and technical studies (Figure 4.1). Consultation was initiated during the scoping study for the ESIA and has continued throughout the baseline period and once the impact assessment documentation was completed in draft. Key stakeholders were being identified and interviewed as part of this process and engagement with them was and is ongoing.

Figure 1. ESIA Process aligned with Technical Studies and BiH Permitting Process

The initial interviews held in November 2019 allowed the social baseline to be initiated whilst introducing the ESIA process to influential members of the community. The meetings conducted are summarised in Table 4.1.

Name and Position	Discussion topic
Zdravko Marosevic; Mayor of Vares Municipality	District-level discussions and context about the Project
Ivan Lovric Bobovac Radio and Newspaper	Understanding of methods of disseminating information, audience reach, perceptions of community.
Almir Cikmis Tourist Information Centre	Current state of tourism in the region, future and current international cooperative projects to improve tourism.
Ramiz Zubaca Imam	Social baseline and general understanding of the project area
Fra Leon Pendic Catholic Priest	Social baseline and general understanding of the project area
Mirnes Hrvat High School Principal	Social baseline and general understanding of the project area – education levels, number of students and progression to future education.
Social Services – Nihada Gondzo	Social baseline and general understanding of the project area

<i>Unemployment Centre – JasnaSvincicki Operta</i>	Social baseline and general understanding of the project area
<i>Health Centre (Head Nurse and Finance Director) – Taiba Brkic (head nurse)and Mr. Adis Cizmo (director)</i>	Social baseline and general understanding of the project area – approximate health statistics and knowledge of formal statistics available.
Tabela 4.1 Scoping Study Consultation Meetings	
<i>Police Station – Mr. Edin Karamustafic (commander)</i>	Social baseline and general understanding of the project area – crime level and general perception of population.
<i>Vares Library – Ilijana Gavran Radojevic (director)</i>	Data obtained regarding local history, archaeology and cultural heritage. General social baseline data.
<i>M.Z. Borovica Grga Vukancic, M.Z. Przici Jasna Mircic, M.Z. Dastansko Damir Ahmedovic, Community Leaders</i>	Social baseline and general understanding of the project area. Each leader provided an overview of their village / area and the past and current social characteristics as well as their vision for the future.

Second stage consultations were undertaken at the start of the baseline period in February 2020. These consultations allowed identified communities to be studied in greater detail and consultation regarding the implementation of the environmental baseline studies to be included. These consultations are summarised in Table 4.2.

Table 4.2 ESIA Baseline Consultation Meetings	
Name and Position	Discussion topic
<i>Mayor of Vares Municipality Zdravko Marosevic;</i>	Discussion on environmental monitoring, location of monitoring and required permits.
<i>Vares Library Ilijana Gavran Radojevic (director)</i>	Data obtained regarding local history, archaeology and cultural heritage. General social baseline data.
<i>Islamic religious community of Vares Ramiz Zubaca (Imam)</i>	Discussion on environmental monitoring and placement of monitoring points at Mosque in Dastansko.
<i>Kakanj Municipality communities of Nazbilj, Lipnica and Bastasici Himzo Kovacevic Community Leader –</i>	Dissemination of Project information, data gathering for social baseline, implementation of the grievance mechanism.
<i>Community Leader – Vares, Semizova Ponikva and Polozac Izudin Muftic</i>	Discussion on environmental monitoring and placement of monitoring points, implementation of the grievance mechanism and data gathering for social baseline.
<i>Community Leader – Vares Majdan Midhat Dzafo</i>	Discussion on environmental monitoring and placement of monitoring points, implementation of the grievance mechanism and data gathering for social baseline.
<i>Community Representatives – Brezik Janja Mircic and Ljupko Mircic</i>	Discussion on environmental monitoring and placement of monitoring points, implementation of the grievance mechanism and data gathering for social baseline.
<i>Community Representative – Tisovci Jakov Malbasic</i>	Discussion on environmental monitoring and placement of monitoring points, implementation of the grievance mechanism and data gathering for social baseline.

<i>Community Representatives – Visnjici Mila Josipovic and Jozo Josipovic</i>	Implementation of the grievance mechanism and data gathering for social baseline.
<i>Community Representatives – Mlakve Jovanka Gavran and Ivica Gavran</i>	Dissemination of Project Information, implementation of the grievance mechanism and data gathering for social baseline.
<i>Mirnes Hrvat High School Principal</i>	Discussion on environmental monitoring and placement of monitoring points at High school.
<i>National Museum – Sarajevo Andrijana Pravidur and Mirsad Sijeric (director)</i>	Data gathering for social baseline, consultation regarding archaeology and cultural heritage in Project area.
<i>Federal Institute for Archaeology Anto Vujnovic</i>	Data gathering for social baseline, consultation regarding archaeology and cultural heritage in Project area.
<i>Community Leader – Javornik Vinko Gajic</i>	Data gathering for social baseline, implementation of the grievance mechanism.
<i>Community Leader - Pogar Stjepan Petrovic</i>	Data gathering for social baseline, implementation of the grievance mechanism.
<i>Mother Theresa Foundation Gordana Lukic</i>	Information gathering for social baseline, identification of elderly vulnerable groups and the work of the NGO.
<i>Community Leader - Borovica Grga Vukancic</i>	Discussion on environmental monitoring and placement of monitoring points in Borovica, implementation of the grievance mechanism and data gathering for social baseline.

As the baseline phase advanced, stakeholder consultation continued. Additional meetings, focus groups and semi-structured interviews which was carried out included the following:

- Meeting with business owners (Hardware store, bakery, butchery, local cafes, food store, Mlin Hotel owner etc.). The Association of Employers Vares was founded in 2015. On January 12th, 2021, the election assembly of the association was held. During March, cooperation with the representatives of this association was established for their representatives to get acquainted with the Project and its activities, as well as with the plans and work of the association itself. In January 2022, the Association initiated a meeting with the company's management to express interest in the participation of local businessmen in the upcoming activities during the construction phase;
- Meeting with school representatives. Meetings were held with representatives of the management of the Elementary School Vares and Vares Majdan. The management was acquainted with the work of the company, and on that occasion, data on the number of students attending these two schools were provided. The trend of the decreasing number of students from year to year is a big problem. What is expressed are the difficulties that the school management faces during the process of online teaching and providing the necessary technology for students, for this process to be successfully realized. In 2021, the Adriatic Metals company initiated the introduction of a new educational course in the curriculum of the High school "Nordbat-2" Vares, miner in underground exploitation, and cooperation was also achieved in the form of equipping the cabinet for the course. In the previous school year, 6 students attended the mining course, and also in the new school year 2022/2023 5 students enrolled;

- Religious leaders – During the month of January, a meeting was held with representatives of religious communities in Vares. The meeting was attended by representatives of the Islamic Community and the Orthodox Church and subsequently a meeting was held with a representative of the Catholic Church. The reason for the meeting was to acquaint the representatives with the activities of the project and to collect certain socio-economic data. All communities are facing a reduced number of people and thus incomes are reduced. Delivery of leaflets and newsletters to these communities has also been agreed. During March, a meeting was held with the representatives of the local community in Borovica and with a priest from Borovica. He is also acquainted with the current events of the project and future. During his address, it was pointed out that the church in Borovica is celebrating its 100th anniversary in 2022 and that its congregation has reduced drastically. This church used to have 1,500 congregants and now that number is about 50 people;
- Vares Forestry - from the beginning of its activities, the company has achieved excellent cooperation with Vares Forestry and its management has been informed about all Project activities. Also, during March 2020, WAI consultants held a meeting with representatives of this company to gather information from the domains related to the forest fund, its protection and preservation, to get acquainted with the specifics of this area and the way this institution works. They were also informed about the legislation in this area and the competent institutions. An agreement was signed with the Forestry, for the purpose of compensating for the losses that the project activities will cause in the area of Rupice. Also, a detailed "Degraded Forest Restoration Plan for the purpose of compensating for the loss of biodiversity in the habitat of acidophilic spruce forests caused by the implementation of the Rupice Mine Opening Project" was drawn up, which clearly defined the area where restoration will be carried out and to compensate for the loss of these habitats. These activities will be supplemented and executed in the coming period;
- Hunting Association "Zvijezda" Vares - WAI consultants held meeting with the president of this association during March to gather all the necessary information regarding biodiversity. The main reason for the meeting was to gather information from the domains related to the hunting fund, protection, and conservation of wildlife, to get acquainted with the specifics of this area and the way the society works. They were also informed about the legislation in this area and the competent institutions.
- Association of Sport Fishermen Vares - The purpose of the meeting was to gather information from the domains related to fish stocks, protection, and preservation of fish stocks, to get acquainted with the specifics of this area and the way the association works. They were also informed about the legislation in this area and the competent institutions.

Household surveys have been carried out across the communities of Borovica, Dastansko, Tisovci, Przici, Visnjici, Brezik, Semizova Ponikva, Osredak, Polozac and Pogar, by local companies. These surveys broadly covered the following topics:

- Household demographics;
- Property tenure details (as an optional question, and with explanation about purpose of data collected);
- Education of household members;
- Household finances and expenditure (as optional question);

- Town and household facilities (water supply, power, heating and wood supply);
- Ecosystem services (agricultural activities, grazing livestock, hunting, foraging, fishing, recreational activities – including location, quantity, occurrence etc.);
- Travel and transportation – perception of current services;
- Health – health conditions, access to health care, funding available, transportation; and
- Perception of Vares Project and current engagement.

Additional consultation, in line with IFC PS/EBRD PRs, will include a Public Hearing, presenting the findings of the draft ESIA on conclusion of the Project. This required a non-technical summary which was to be compiled and dispersed to community members 60 days (EBRD) prior to the consultation date. The consultation is also advertised for this period. Following the consultation, the ESIA was finalised, considering the views of the community as appropriate.
